

# Apheta

"The giving of life"

A moving coil cartridge by  
**REGA**

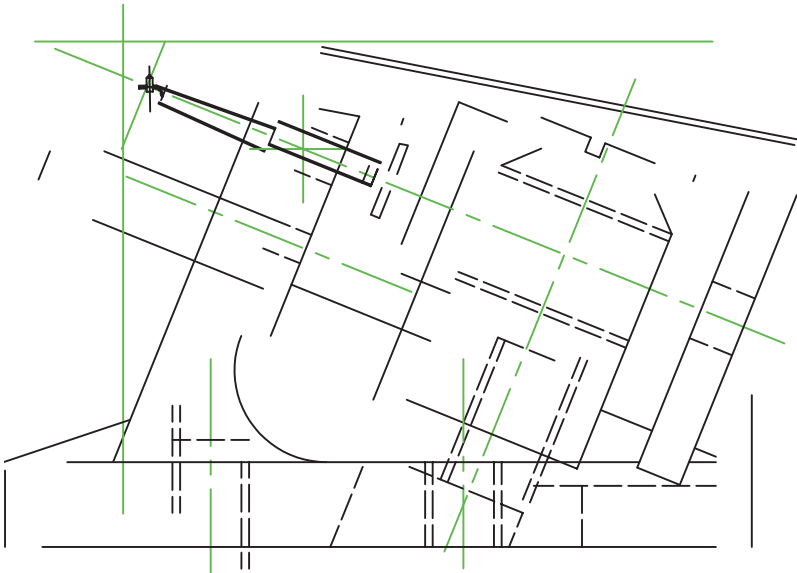

Four years in development!  
The combined effort of an entire design team!!  
The **APHETA** moving coil is born...!!!  
The use of new magnetic materials and engineering techniques has allowed Rega to design a completely new generator system making the **APHETA** totally unique and our most innovative cartridge to date.  
Every **APHETA** is hand built using the finest materials by a highly skilled and dedicated production team.  
This ensures the **APHETA** is built to an exceptionally high standard delivering unrivalled performance.

## APHETA - Connection Details

Blue: LH Earth / Green: RH Earth / Red: RH Signal / White: LH Signal

## APHETA - Tech

Each of our cartridges is painstakingly hand-made in house at Rega using only the finest materials, processes and skills to produce them.

It is this dedication to our cause that enables us to produce these hand crafted products for your listening pleasure.

The design of the **Apheta** eliminates excessive high frequency resonance excited by conventional tie wire designs.

The Rega generator surpasses older technologies and addresses known MC conflicts by achieving high quality performance at both high and low frequencies simultaneously.

**Apheta's** natural high frequency resonance is subtle and low in amplitude therefore eliminating the need for insensitive damping designs.

### Technical Specifications

- Typical technical characteristics of the **APHETA**
- Tracking pressure 1.75g
- Input load impedance 100 Ohms
- Output impedance 15 Ohms
- Output voltage 500uV
